

ATHENS TECHNICAL COLLEGE
VETERINARY TECHNOLOGY

COMMISSION OF A FELONY MAY PREVENT YOU FROM OBTAINING REGISTRATION AS A VETERINARY TECHNICIAN IN THE STATE OF GEORGIA. Please read the following:

All applicants for registration as a Veterinary Technician shall consent to a criminal background check. OCGA 43-50-41. The board shall have the authority to refuse to grant, to revoke, or to discipline the registration of any veterinary technician if such person has any of the following:

- 1) a felony conviction;
- 2) a conviction for any crime involving moral turpitude;
- 3) an arrest, charge, or sentence for any felony or crime involving moral turpitude where:
 - a) a plea of nolo contendere was entered,
 - b) first offender treatment granted, or
 - c) the adjudication was otherwise withheld.

A felony includes any offense which, if committed in the state of Georgia would be deemed a felony. A conviction includes either a verdict of guilty or a plea of guilty. OCGA 43-50-41.

Along with criminal background checks, the state licensing board and our clinical partners may require the student to complete drug testing prior to his/her clinical rotation. A failure to provide a negative drug testing sample will prevent the student from attending the clinical rotation, and therefore, graduating from the program.

I have read the above statement and recognize that commission of a felony or any other crime of moral turpitude may prevent me from obtaining registration as a veterinary technician in the State of Georgia upon completion of the program.
